Michel's GRAVEL GUARD

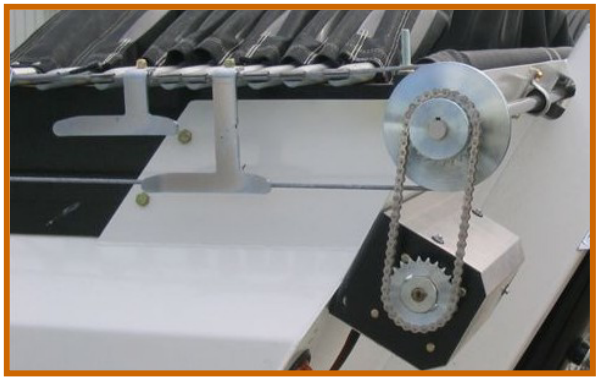
Standard Gravel Guard
Tarp material sits to the inside of the boards of the trailer

Semi Waterproof Gravel Guard
Tarp material sits to the outside of the boards of the trailer

Waterproof Gravel Guard
Tarp material comes down the side of the trailer shedding all water and holding in heat

" The Tarp Specialists"

- No tie downs, which means no wasted time
- Bows and tarp are self-contained and move together.
- Standard bow height is 12". This enables the tarp to be stored clear of heaped loads and remains stored until further needed.
- The tarp fabric is secured to the bows at 30" centers.



- Specially designed lock clips are used to secure the tarp fabric assembly to the trailer wall to prevent billowing.

OPTIONS:

- 18" rise tarp bows
- 4 fabrics; Vinyl (20 oz and 22 oz.), Mesh, 22 oz. neoprene,
- Sprocket drive (using hydro chain or Stainless steel)
- Aluminum front end-cap/hood
- Semi waterproof and waterproof models
- Chain or belt drive
- Electrically operated by rocker switch or **WIRELESS REMOTE**

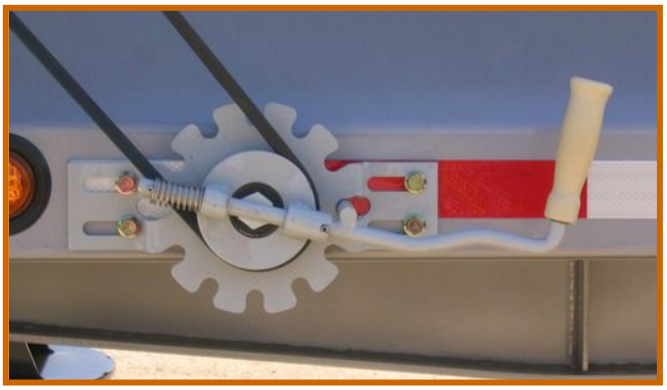
Printed in Canada

- The rear tension adjustment is simple and easy to use
- A ¼" steel aircraft cable is used with pulleys to open and close the tarpaulin system.
- A PVC slider is mounted on the underside of each end of the tarp bows to reduce friction.

- A stainless steel front shaft makes bearing installation easier and reduces corrosion



- Specially designed 12 position crank assembly secures handle during operation
- Gravel Guard systems are available for trailer lengths up to 48 feet

- Electric chain drive (shown) or optional belt drive available
