

Michel's

HOPPER AUGER

ALUMINUM OR STEEL SYSTEMS AVAILABLE
IN 8" OR 10" MODELS
FOR 1, 2 or 3 HOPPER TRAILERS
Manual Flow Control, **Optional** Wireless Remote or the **Optional**
200 Series Integrated Wireless Remote

I can control the augers from up here with this Wireless Remote

“One Man”
“One Stop – No Moving”

- The Hopper Augers are easily detached by removing 5 bolts. The trap door can be opened to allow for easy unloading at the elevator.

- This system can also be used as a transfer auger in the fall.
- The specially designed gearboxes have a shaft angle and double ball bearing to provide years of dependable service.

- Augers come with center delivery, enabling delivery of two or more products in one stop.
- One 8" Hopper Auger will keep a 10" Air-seeder Auger full.
- Unloading with both 8" Hopper Augers will keep up to a 10" swing auger, or 80 bushels per minute.
- Unloading with both 10" Hopper Augers will keep up to a 13" swing auger, or 140 bushels per minute.
- The hydraulic requirement is 15 GPM with a 2500 p.s.i. by-pass and a minimum of a 25 gallon reservoir.
- A 5.9 cubic inch hydraulic motor comes with a flow control valve to regulate speed (Manual Flow Control Only) and a on/off valve for the Wireless Remote. The hydraulic motor can be powered by adding into the loop of the existing hydraulic line on the air-seeder, or by a hydraulic unit on the semi trailer unit.

- 200 Series Wireless remote conversion kits available for all Hopper Augers

- 3 Hopper Systems

Michel's 200 Series Integrated Wireless Remote allows operation of each individual product.

 Convey Hawk	 Gate Opener	 Hoist	 Electric Side Roll Tarps Farm & Semi
 Swing Augers	 Lights	 EZ Opener CHUTE OPENERS	 Hopper Augers
