

Good-Bye Blood, Sweat & Tarps

Aero Industries has designed a rolling tarp system that provides security and protection for loads best carried on a flatbed trailer. The Conestoga 2 transforms a flatbed into a fully covered, weatherproof van in a matter of minutes. Instead of climbing over the trailer and tying down a tarp, the Conestoga 2 allows drivers to cover and uncover cargo in minutes as they safely walk alongside the trailer.

This innovative tarping system is faster and safer for drivers and provides better protection for such cargo as aluminum, steel, lumber, machinery and building products. The Conestoga 2 increases profits by enabling drivers to spend more time on the road and increasing backhaul options.

Like the original Conestoga, the Conestoga 2 features our smooth and durable steel wheel on a stainless steel track design. The most innovative tarping solution on the road today, the Conestoga 2 offers these measurable benefits:

Attractive Appearance The panelized tarp gives an attractive, tight look, highlighted by the sleek front bulkhead.

Saves Time A full load can be covered in minutes. Less time tarping means more time driving.

Saves Money Quick to load. Easy to cover. That saves time, and time is money.

Loads Easily Tarp quickly slides into any position for easy loading and unloading.

For more than 60 years, Aero Industries, Inc. has been pioneering innovative accessories for the transportation industry. We've taken that expertise and designed a rolling tarp system that outperforms any other on the market today, with an attractive appearance and increased functionality, safety, convenience and durability.

Load & Go!

The Conestoga 2 can transform your flatbed or straight truck into a fully covered, weatherproof van in minutes. Aero's innovative rolling tarp system, the Conestoga 2, offers an attractive appearance, loads easily, covers quickly, offers full protection from the elements, increases safety, and saves you time and money.

Aero Industries, Inc. has been the industry leader of cargo protection products for the transportation industry for more than 60 years. Call us today and let us show you how the Conestoga 2 can save time and money—and say good-bye to blood, sweat and tarps!

Rolling Tarp System

CONESTOGA 2®
Continued Innovation

Conestoga 2® is the newest generation of rolling tarp system from Aero Industries. Named after the covered wagon of early pioneers, Aero's original Conestoga featured an innovative rolling tarp that covered and uncovered a flatbed trailer in minutes. Now, Conestoga 2 adds many new features to improve this unique system and offers additional options.

Attractive, durable, and easy to use, the Conestoga 2 features a rear locking mechanism that ensures uniform tarp tension, steel wheels on a stainless steel track, and a bulkhead that meets specific DOT strength standards.

Conestoga 2 is made to your specifications, ensuring a perfect fit for 96" or 102" flatbeds or straight trucks.

Call us today at 1-800-535-9545 to learn how the Conestoga 2 can add speed, safety and productivity to your business.

Panelized tarp allows for easy removal of sections

Panelized Tarp

- Seamless, one-piece appearance
- Easy to remove sections reduce tarp repairs and replacement costs
- Hides aluminum bows for continuous, one-piece look
- Automatically seals against track and bump rail for watertight fit
- Urethane topcoat available in a variety of colors
- Ideal for custom painted or digital graphics
- Patented feature

DOT Bulkhead

- Only DOT-rated bulkhead to meet both the U.S. Department of Transportation width regulation 658.16 (b)(2)(vi) and standard 393.114 (c)(2) for loads up to 50,000 lbs. (patented)
- Sleek, smooth design is aerodynamically designed to reduce drag and increase fuel efficiency
- Integrated, upper corner lighting for improved visibility and distinctive appearance
- 10" wrap for maximum loading area
- Built-in front lock assemblies for maximum loading clearance
- Optional polished finish
- Non-DOT rated bulkhead also available (pictured right)

Non-DOT rated bulkhead shown with access door

Uplift Bows

- Reduces tarp pleating to maximize inside loading clearance
- Choose from Quad or Double Uplift Bows
 - Quad Bows designed for tall loads; reduce tarp sag to 4-6"
 - Double Uplift Bows reduce tarp sag to 8-10"
- Patented spring shocks on uplift bows reduce vibrations from road conditions and maximize tarp lift
- Less wear and tear on tarp
- Virtually maintenance-free — no fasteners, pins or bushings to service or replace

Wheel & Track System

- Steel wheels glide easily on a stainless steel track insert
- Steel-on-steel design facilitates smooth opening and closing
- Eliminates costly downtime and maintenance
- Sealed bearings require no maintenance
- Wheels covered by Lifetime Warranty
- Patented built-in bump rail protects track from forklifts and other loading hazards and automatically ensures a watertight seal for the tarp

Rear Locks

- Operated from the ground for increased safety — no climbing on trailer
- Driver can adjust tarp tension through rear locks by simply turning a crank handle
- No cumbersome straps or hardware to remove or store
- Fast, easy, secure
- Lock mechanism is hidden inside bulkhead wing for safety and longevity
- Ensures positive locking and watertight seal

Front Locks

- Operated from the ground for increased safety — no climbing on trailer
- As simple as turning a ratchet handle — no cumbersome straps or hardware to remove or store
- Fast, easy, secure
- Lock mechanism is hidden inside bulkhead wing for safety and longevity
- Ensures positive locking and watertight seal
