9. What are the finished measurements of your Existing fabric as if laid flat on the ground?

L = _____

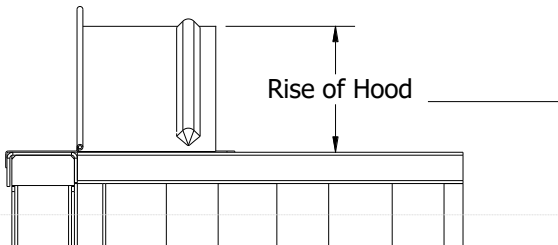

W (optional) = _____

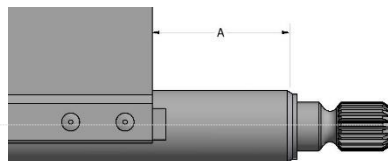

10 What is the TOP outside WIDTH of the trailer/box
NOTE: Ensure Front and Rear measurements are the same. If box is tapered both the front and rear measurements must be supplied.

11 What is the TOP outside LENGTH?
(Front Face of Front Hood to the Rear Face of the Rear hood) (Should be 3" to 5" more than tarp length)

13 What is the rise of the hoods?

14 Measure from the center of the weld on the spline to the tarp material (See Below "A")

15 NOTE: Locking flange and tarp stops should be mounted 1/4" below the top rail of the trailer. Some trailers (lots of Timpte) the locking flange or tarp stops can not be mounted this high and a different tarp width is needed. Is your Locking flange and Tarp stops mounted 1/4" below the top rail? (Please Circle)

YES

NO

(If "NO", pictures and measurements may be required)

NOTE: Wrong Measurement given to us by customer will result in an additional charge on invoice due to the adjustments which have to be made on tarp material. So please measure carefully.
